

Cardiomemo Event Heart Recorder

An information guide

Cardiomemo Event Heart Recorder

Why have I been referred for cardiomemo?

Sometimes you may experience palpitations, chest pains or other symptoms that might not have been detected during routine heart examination but are evident in everyday life.

However these symptoms may not be felt regularly enough to be seen on a regular 24 hour monitor. It is therefore necessary to monitor your heart for a longer period of time during normal daily activities. You will not need to stay in hospital for this test.

What will happen during my appointment?

The physiologist will provide you with a small handheld device (about 1lb in weight) to carry round with you for up to one month.

You are not required to have it attached to you constantly, it is to be used manually when your symptoms are present. The physiologist will explain to how to make manual recordings and will answer any questions or problems you have regarding the test.

It is important that you carry the recorder round with you at all times and you continue with all your daily activities including sport and active pursuits that you would normally carry out.

After the test

Your data will be analysed and the results will be sent to the consultant who has requested your test.

Are there any risks?

There are no risks associated with this test.

Should you require any further information please contact Cardio Respiratory on:

Fairfield General Hospital - 0161 778 2028

Royal Oldham Hospital - 0161 656 1163

If English is not your first language and you need help, please contact the Interpretation and Translation Service

The Northern Care Alliance NHS Group (NCA) is one of the largest NHS organisations in the country, employing 17,000 staff and providing a range of hospital and community healthcare services to around 1 million people across Salford, Oldham, Bury, Rochdale and surrounding areas. Our Care Organisations are responsible for providing our services, delivering safe, high quality and reliable care to the local communities they serve.

The NCA brings together Salford Royal NHS Foundation Trust and the hospitals and community services of The Royal Oldham Hospital, Fairfield General Hospital in Bury, and Rochdale Infirmary (currently part of The Pennine Acute Hospitals NHS Trust).
