Overall Summary of Performance

- **Initial Assessment - Ambulance arrivals**: 95% of patients waited under 19 minutes from arrival to initial assessment (threshold 15 minutes).

- **Treatment**: On average, patients waited 69 minutes from arrival to treatment (threshold 60 minutes).

- **Total time in A&E**: 95% of patients not requiring admission to hospital waited under 299 minutes from arrival to departure (threshold 240 minutes).

- **Consultant Sign-off**: 95% of patients who needed admission to hospital waited under 747 minutes from arrival to departure (threshold 240 minutes).

- **Legend**:
  - Green: Meets Performance threshold
  - Pink: Does not meet threshold

- **Re-attendance**: 3.1% of attendances this month left the department before being seen (threshold 5%).

- **Left without being seen**: 7.8% of attendances this month were unplanned re-attendances (threshold 5%).

- **Ambulatory Care Q3 - 2014/15**: 24% of patients with cellulitis, and 76.9% of patients with deep vein thrombosis are admitted for treatment (No threshold).

This indicator uses information that will be made available as part of the College of Emergency Medicine’s clinical audit programme; this information will be included in the dashboard as it becomes available (No threshold).
Overall Summary of Performance

- **Initial Assessment - Ambulance arrivals**: 95% of patients waited under 43 minutes from arrival to initial assessment (threshold 15 minutes).

- **Treatment**: On average, patients waited 60 minutes from arrival to treatment (threshold 60 minutes).

- **Total time in A&E**: 95% of patients waited under 323 minutes from arrival to departure (threshold 240 minutes).

- **Consultant Sign-off**: 95% of patients not requiring admission to hospital waited under 235 minutes from arrival to departure (threshold 240 minutes).

- **Left without being seen**: 3.1% of attendances this month left the department before being seen (threshold 5%).

- **Re-attendance**: 8.5% of attendances this month were unplanned re-attendances (threshold 5%).

- **Ambulatory Care Q3 - 2014/15**: 31.8% of patients with cellulitis, and 45.8% of patients with deep vein thrombosis are admitted for treatment (No threshold).

- **Does not meet threshold**: Meets Performance threshold

Legend:

Overall Summary of Performance

Initial Assessment - Ambulance arrivals

95% of patients waited under 27 minutes from arrival to initial assessment (threshold 15 minutes)

On average, patients waited 66 minutes from arrival to treatment (threshold 60 minutes)

95% of patients waited under 468 minutes from arrival to departure (threshold 240 minutes)

95% of patients not requiring admission to hospital waited under 323 minutes from arrival to departure (threshold 240 minutes)

95% of patients who needed admission to hospital waited under 683 minutes from arrival to departure (threshold 240 minutes)

Consultant Sign-off

This indicator uses information that will be made available as part of the College of Emergency Medicine’s clinical audit programme; this information will be included in the dashboard as it becomes available (No threshold).

Ambulatory Care Q3 - 2014/15

19.5% of patients with cellulitis, and 16.1% of patients with deep vein thrombosis are admitted for treatment (No threshold)

Legend

- Green: Meets Performance threshold
- Pink: Does not meet threshold

Left without being seen

4.6% of attendances this month left the department before being seen (threshold 5%)

Re-attendance

7.5% of attendances this month were unplanned re-attendances (threshold 5%)
Overall Summary of Performance

Legend

- **Initial Assessment - Ambulance arrivals**
  - 95% of patients waited under 50 minutes from arrival to initial assessment (threshold 15 minutes)

- **Treatment**
  - On average, patients waited 63 minutes from arrival to treatment (threshold 60 minutes)

- **Total time in A&E**
  - On average, patients waited 236 minutes from arrival to departure (threshold 240 minutes)
  - 95% of patients not requiring admission to hospital waited under 234 minutes from arrival to departure (threshold 240 minutes)

- **Consultant Sign-off**
  - 95% of patients not requiring admission to hospital waited under 234 minutes from arrival to departure (threshold 240 minutes)

- **Ambulatory Care Q3 - 2014/15**
  - 8.6% of patients with cellulitis, and 95.7% of patients with deep vein thrombosis are admitted for treatment (No threshold)

- **Re-attendance**
  - 5.3% of attendances this month left the department before being seen (threshold 5%)

- **Left without being seen**
  - 5.5% of attendances this month were unplanned re-attendances (threshold 5%)

- **Does not meet threshold**
  - Meets Performance threshold

This indicator uses information that will be made available as part of the College of Emergency Medicine's clinical audit programme; this information will be included in the dashboard as it becomes available (No threshold).
